

## INSTRUCTION MANUAL

READ INSTRUCTIONS CAREFULLY BEFORE WIRING.

**WARNING:** In Quebec, the installation of this product must be carried out by a qualified electrician.

**CAUTION:** To prevent electrical shock, make sure the power is turned off at the fuse box before proceeding. Do not exceed the maximum wattage stated on the socket.

### WIRING INSTRUCTIONS:

1. Fasten the crossbar to the ceiling box using the ceiling box screws provided.
2. Thread the long support screws through the holes at each end of the crossbar.
3. Pull wires from box and remove the wire nuts holding them together, or cut the connections.
4. With the wire nuts, connect the black wire of the fixture to the black supply wire, the white fixture wire to the white supply wire. Secure the grounding wire from the outlet box and the grounding wire from the fixture to the cross bar with the green mounting screw provided.
5. Carefully tuck all wires into the ceiling box. Line the head of the screws up with the keyhole openings on the base of the fixture, and push the base up so the screw heads slide through the large openings of the keyholes. Twist the fixture to seal the screws, and tighten the support screws.
6. Screw the thumb screws provided part way through the holes on each side of the fixture. Install light bulbs. Put glass on base and secure with thumb screws (finger tighten only).
