

ASSEMBLY AND INSTALLATION INSTRUCTIONS

WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER WHILE INSTALLING OR SERVICING THIS FIXTURE.

NOTE: Before installing, consult local electrical codes for wiring and grounding requirement.

Installation Steps

1. Carefully unpack your new fixture and lay out all the parts on clear area. Take care not to lose any small parts necessary for installation.

2. Secure the back plate to outlet box by using 2 mounting screws and to the wall by using the 2 anchor screws with anchors.

3. Make wire connections:

–Attach ground wire to house ground wire using a wire nut or attach them to the back plate with a green ground screw.

–Attach white wire from light to white wire from power source with a wire nut.

–Attach black wire from light to black wire from power source with a wire nut.

Observing: positive wire with positive wire, negative wire with negative wire, ground wire with ground wire.

*** Make sure all wire connectors are secured and do not easily pull off with the slight tug.

4. Tuck the wire connections neatly into the outlet box.

5. Place the fixture front plate to back plate by using 2 screws each at top and bottom screwed together.

6. Put spacer ring on the socket then Install bulb with socket ring and glass.

7. Turn on the power at fuse or circuit box.
