

# INSTALLATION AND SAFETY INSTRUCTIONS

## FOR YOUR SAFETY

**WARNING: BE SURE THE ELECTRICITY TO THE WIRES YOU ARE WORKING ON IS SHUT OFF. EITHER THE FUSE REMOVED OR THE CIRCUIT BREAKER OFF.**

## GENERAL

You don't need special tools to install this fixture. Be sure to follow the steps in the order given. Under no circumstances should a fixture be hung on house electrical wires, nor should a swag type fixture be installed on a ceiling which contains a radiant type heating system. Read instructions carefully. If you are unclear as to how to proceed, consult a qualified electrician.

**NOTE: Proper wiring is essential for the safe operation of this fixture.**

## ASSEMBLY

### STEP 1:

Carefully remove the fixture from the carton and check that all parts are included, as shown in Figure. Be careful not to misplace any of the screws or parts which are needed to install this fixture.

### STEP 2:

Knock out appropriate holes in back plate to correspond with holes in outlet box (if needed).

### STEP 3:

Thread lock nut(s) onto threaded end of socket swivel. Take that end and thread it into the back plate. Before tightening, adjust to desired position and secure in place with lock nut.

## INSTALLATION

HC-295

**IMPORTANT: DO NOT ATTACH FIXTURE DIRECTLY TO OUTLET BOX.**

### STEP 1:

Punch out appropriate holes in large gasket to correspond with holes in outlet box (if needed).

### STEP 2:

Slip the wires from the back plate through the large gasket before wiring.

### STEP 3:

A. Take note of the color of the wire(s) on your fixture. Identify which group your fixture wire(s) falls into and connect the wires according to the directions below:

\*NOTE: When parallel wire is used, the tracer wire is square shaped or ridged, and the less tracer wire is round in shape or smooth. (Seen best when viewed from wire end.) To separate wires, grasp the ends of each wire and pull apart.

B. Take your fixture wire(s) from group A and place evenly against the black wire from the outlet box. **Do Not** twist wires together before using wire connectors.

C. Fit a wire connector (not supplied) over the wires and screw the connector clockwise until you feel a firmness.

D. Try gently to pull the connector off the wires. If you can pull the connector off, carefully re-do steps B and C, as above, and check again for a firm connection.

E. Connect the fixture wire from group B to the white wire from the outlet box in the same manner.

### STEP 4:

#### GROUNDING INSTRUCTIONS:

**NOTE:** Underwriters Laboratories (U.L.) does not require all fixtures to have ground wires. These fixtures still meet all U.L. specifications. The listing mark of Underwriters on the product identifies products manufactured under its listing and Follow-Up Service Programs. **NEVER CONNECT GROUND WIRE TO BLACK OR WHITE POWER SUPPLY WIRES.**

### FINAL ASSEMBLY

Make sure no bare wires can be seen outside wire connectors.

### STEP 1:

After wires are connected, tuck them carefully inside the outlet box. Place back plate against outlet box and secure in place with outlet box screws (not supplied).

**CAUTION:** To reduce the risk of electrical shock, provide a watertight seal between the fixture and the mounting surface by using a silicone or similar caulking.

### STEP 2:

Adjust sockets to desired position by loosening screws located on side of swivel. Husk must be aimed down a minimum of 30° below horizontal. Retighten screws.

### STEP 3:

Install lamp.

### CLEANING

To clean, wipe fixture with a soft cloth. Clean glass with a mild soap. Do not use abrasive materials such as scouring pads or powders, steel wool or abrasive paper.

### ORDERING PARTS

Keep this sheet for future reference, and in case you need to order replacement parts. All parts for this fixture can be ordered from place of purchase. Be sure to use exact wording from illustration when ordering parts.
