Installation drawing

1. Determine the quantity of stems and stem lengths needed for installation

2. Connect the stems decided in step 1 to the swivels B, then connect the stems to the fixture body D.

Note: run wire through individual stems before connecting stems together

3. After the wire passes through the canopy, fix the canopy by E nut and F washer.

WIRING CONNECTIONS AND ATTACHING CANOPY TO J-BOX

4. Connect White wire from fixture to White ceiling wire, Black wire from fixture to Black ceiling wire and Green ground wire to Green ground wire in ceiling or to ground screw on mounting bracket if no ground wire in ceiling.

5. Install recommended bulbs

6. Attach glass diffusers by screwing onto socket cups to conceal sockets
